

Certification of Management Systems

Výzkumný Ústav Železniční, a.s. (VUZ) is a leading provider of certification services for management systems. These services are delivered through the VUZ Quality Systems Certification Body, which is accredited by the ČIA (Czech Accreditation Institute). The scope of accreditation is outlined in the Certificate of Accreditation for Certification Body No. 3257. The VUZ Certification Body is an attractive choice in areas such as railway transport, engineering, production and repair of railway vehicles, construction, warehousing, or related sectoral training. VUZ has extensive experience in these fields.

Services provided:

- › ISO 9001 - Certification of Quality Management Systems (QMS)
- › ISO 14001 - Certification of Environmental Management Systems (EMS)
- › ISO 45001 - Certification of Occupational Health and Safety Management Systems (OHSMS)
- › ISO/IEC 27001 - Certification of Information Security Management Systems (ISMS)
- › ISO 50001 - Energy Management System (EnMS)

Benefits of ISO certifications:

- › Competitive advantage - internationally recognized standards, certification often decides on tenders and tenders.
- › Increased efficiency - established standards improve internal processes and reduce waste.
- › Risk minimisation - a systematic approach helps prevent errors and crises.
- › Better relations with partners and authorities - certification increases trust and facilitates cooperation.
- › Continuous improvement - emphasis on innovation and adaptation to change.
- › Sustainable growth - certification as a tool for long-term development and social responsibility.

Benefits of VUZ:

- › Impartiality, reliability, credibility and tradition
- › Guarantee of expertise and professionalism
- › Extensive knowledge of the railway sector across Europe
- › Emphasis on optimisation and simplification of company processes ("minimum paperwork")
- › New opportunities for assessment and integration of products and services offered
